

Material and Welding Engineer

Location:	Bristol – Travel Required
Salary:	Competitive
Hours:	40 hours per week
Contract:	12 months PAYE Fixed Term Contract

The Ortec Group offers a high value-added engineering service. Founded on the expertise of engineers and technicians, combining knowledge of industrial sectors, field culture with more than 30 years' experience, Ortec Engineering is 40 agencies in France, a presence on four continents and two offshore production centres.

Design engineering provides a varied foundation of complementary skills to meet a broad range of traditional technical engineering needs. To facilitate discussions and to be more responsive and available, the Ortec Group has chosen local offices: located as close as possible to our customers, they bring together all the trades involved in a given project in one place.

The role:

As part of the expansion of our Engineering and Projects activities, we are recruiting Engineers to support us in our growth in the Nuclear Energy sector. We are looking for Engineers who have experience in the nuclear sector, either within the generation fleet, EPR nuclear new build (Olkiluoto, Flamanville, Taishan or Hinkley Point C) or other relevant nuclear site (Sellafield, ITER...)

Sonovision will provide a Training program based on ORTEC experiences in French Nuclear engineering if required.

Key Tasks and Responsibilities:

Reporting to the Business Unit Manager, fulfil the role identified below

The mission is to performance the surveillance of equipment manufacturing activities for the new nuclear build project.

These main activities are:

- To perform the surveillance of the supplier and to ensure technical documentation compliance from suppliers for mechanical components (motors, pumps, turbine, valves, actuator...) with regards to technical standards and norms (RCC-M, ESPN)
- To complete technical review and prepare report, in line with the compliance criteria, to raise and issue non-conformity report.

Frequent travels within the UK are expected.

The right candidate will have the following skills and background:

Essential:

- Degree in material and/or welding with knowledge of manufacturing process
- An experience in surveillance activities for mechanical equipment, minimum 5 years
- Rigor in the production and review of deliverables and reporting
- Knowledge of RCC-M and/or ESPN norm
- Relational ease with customers and partners
- Proficient in English

Desirable:

- International Welding Engineer / Technologist degree will be desirable

Screening:

- Do you have minimum 5 years' experience in manufacturing surveillance?
- Do you have a degree in material and welding?
- Do you have knowledge of RCC-M and/or ESPN norm?
- Are you eligible to live and work in the UK, with a valid Passport?
