

## Business Unit Manager

<b>Location:</b>	Bristol
<b>Salary:</b>	Attractive packages
<b>Hours:</b>	40 hours per week
<b>Contract:</b>	Permanent

Sonovision are a multi award-winning company who provide document engineering, product design and marketing services to global OEMs across a wide variety of sectors including Defence, Aerospace, Energy and general Industry.

A key strategy for Sonovision is the expansion of our core engineering portfolio with our existing client base, in particular, the Energy sector.

### The role:

As part of the expansion of our Engineering and Projects activities, we are recruiting a Business Unit Manager to support us in our growth in the Nuclear Energy sector.

### Key Tasks and Responsibilities:

**Reporting to the Executive Team, fulfil the role identified below**

Business development:

- Maintain excellent relationships with your customers and identify new projects.
- Promote the Engineering offer of the Sonovision Group
- Actively participate in all commercial aspects of current and prospective contracts in collaboration with Sonovision Group subsidiaries
- Contribute to the development and promotion of relevant and innovative technical solutions.

Recruitment of consultant Engineers/Technicians:

- Leadership and responsibility of the end-to-end recruitment cycle – from identifying candidates to job offer
- Liaise with Human Resources and other stakeholders throughout the recruitment cycle
- Develop and maintain a recruitment strategy in-line with on-going and future project needs

Management of Business Unit:

Demonstratable management skills related to the supply of design and engineering services. This includes but not limited to:

- Project Scheduling / Capacity planning
- Budget Maintenance and reporting
- Contract management
- Supplier management
- Application of contract specific quality activities
- Internal and external reporting

## The right candidate will have the following skills and background:

- Minimum of 7 years' relevant experience within an engineering environment, with Nuclear industry experience.
- Practical experience of working with EPR or EPR2 a distinct advantage.
- Energy, Environmental or Nuclear Engineering bachelor's degree or equivalent qualification / experience
- Previous or current work history with EDF, FRAMATOME, ORANO and/or nuclear manufacturers/equipment manufacturers.
- Comprehensive understanding of core topics including mechanical and electrical engineering, installation, commissioning, system engineering, and safety
- Excellent inter-personal and relationship skills and a strong interest in the world of consulting
- Creative and ambitious, you want to join a company where performance is rewarded and team spirit takes precedence.
- Autonomy, a sense of innovation, strength of proposal, a culture of commitment, open-mindedness, listening and customer skills

Please note, candidates must successfully undergo UK Security Vetting before they can be appointed. The level of security needed is Security Check (SC).

## Screening:

- Do you have 7 years' experience working within Nuclear energy industry?
- Energy, Environmental or Nuclear Engineering bachelor's degree or equivalent qualification / experience
- Do you have proven experience maintaining excellent relationships with your customers and identifying new prospects?
- Have you experience of recruiting Engineers and Technicians?
- Are you eligible to live and work in the UK, with a valid Passport?
